

D2L - Release Conditions

*Restrict access to course materials, an assessment,
a grade or a news item*

Examples:

Restrict access to a discussion/quiz/assignment

- unless they visit a specific topic(s) in the Content
- to only specific student(s)

Require students to

- submit an assignment or take a quiz before accessing certain course material(s)
- to score a certain % before they can access certain course material(s)

Restrict a news item be viewed by students who failed to attend a Zoom session etc.

Best Practice: Always let students know the type of release conditions used in the course.

- Before students are aware and ask questions as to why they do not have access to a certain item or area in D2L.
