

# D2L Quiz - Randomize Questions

Use Assessments > Quizzes for Quizzes / Tests / Exams

- Present all questions in a different order so *every student's exam seems like it is different*
- Present only a few questions out of a bigger question pool
- Group randomize questions by question type and point values

## Best Practice:

- Always let students know that the quiz / test / exam presents questions randomly
- Always provide a practice test so students experience it before taking the final test
- Use \*'Automatic Grade' & 'Auto Export to Grades' features

\*Note: Auto Grade works for multiple-choice, true/false, multi-select, and matching type questions

1	Random Section 1 (30 from 45)
1	Q1. Random Question
1	Q2. Random Question
1	Q3. Random Question
1	Q4. Random Question
1	Q5. Random Question
