

D2L - '@mentions' feature

Students & Instructors can tag other students in discussions within the same course using the '@mentions' feature

- To tag a student or instructor, type '@' followed by the user's first or last name.
- A pop-up box will appear for you to select the user you want to tag
- The tagged user will then be notified by alerts in the minibar that they were tagged.
- Example: @Eric*

A screenshot of the D2L discussion thread creation interface. At the top, it says "Week 1" with a dropdown arrow. Below that is a "Subscribe" button with a star icon and a text input field labeled "Add a description ...". The main text area contains "@student" with a dropdown menu showing "Student Pallapu". Below the text area are checkboxes for "Pin thread" and "Subscribe to this thread".
